

Dear SECRETO Investigators,

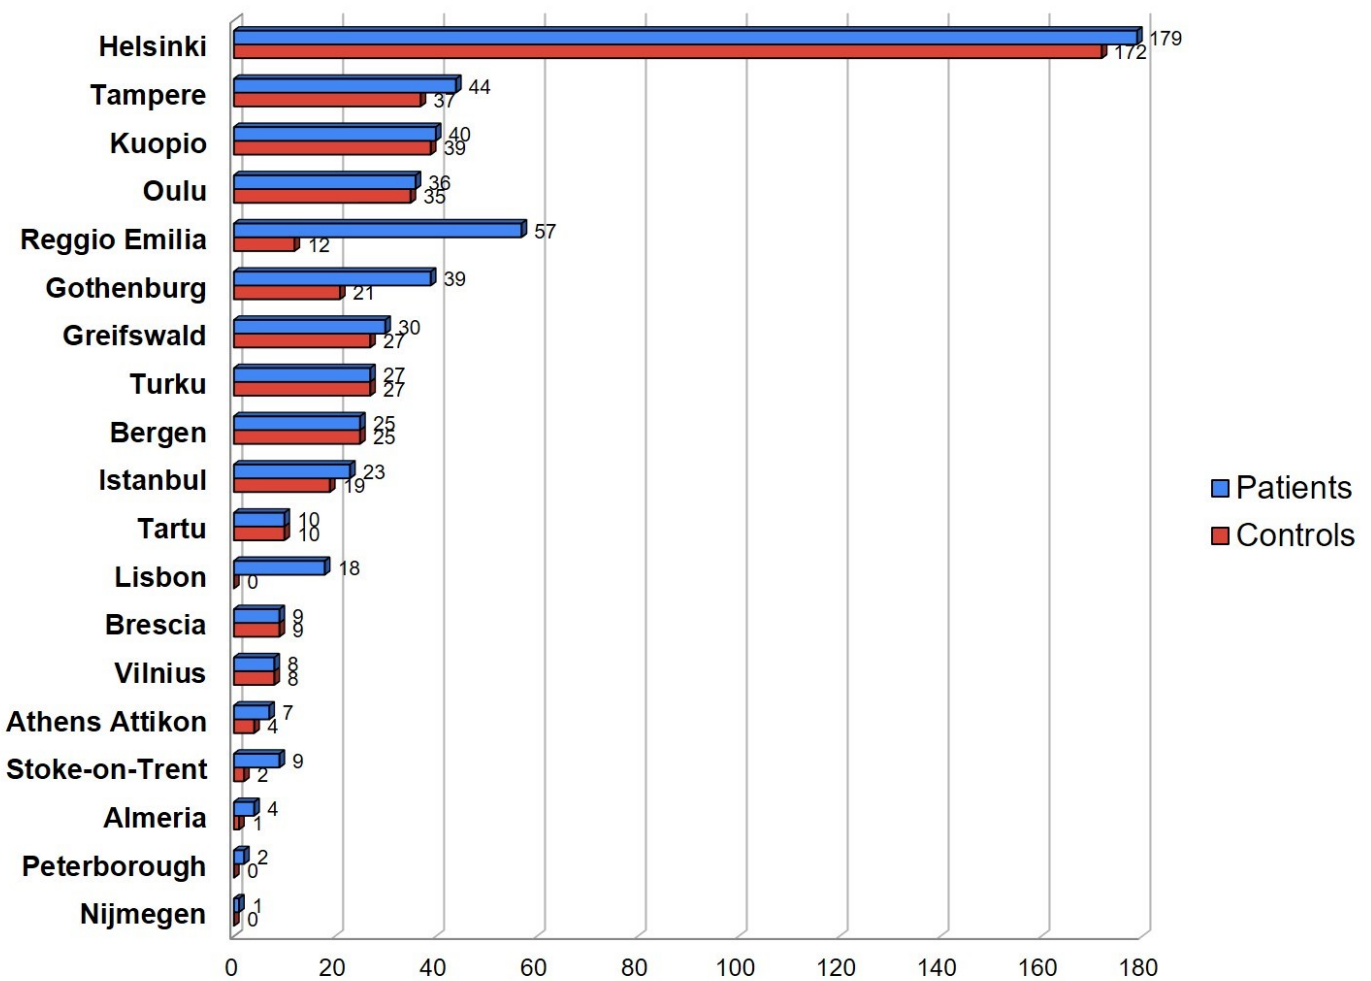

May was an exceptionally good month in terms of recruitment of both patients and controls! Warm thanks to everyone who contributed by enrolling new participants.

We have now enrolled a total of 568 (94.7%) patients and 448 (74.7%) controls and are soon reaching two important milestones: 95% of patients and 75% of controls.

Our current control : patient ratio is 78.9%, and it is favorably increasing. NB! We need to recruit only 32 patients to reach our target patient sample size.

Let's keep up the good pace -- together we can make it!
