

The summer has arrived and we are approaching the anticipated end of recruitment of the SECRETO study!

Once you have entered at least all patient baseline data and data for control subjects, please contact us to settle the accounts.

We wish everyone best of luck and strength in the final spurt and hope you have a relaxing and restorative summer!

Deadlines

CONTROL RECRUITMENT — AUGUST 31, 2022

Two more centers, Kuopio and Stoke-on-Trent, reached the **100% Patients:Controls Team**, and there is only one control missing in Gothenburg. Well done!

It is extremely important to do everything you can to recruit the final control subjects so that we can move on to the next phase with the study.

ECHO DATA TO BERGEN — JUNE 30, 2022

Please send echo data to the Core Lab by the end of this month.

IMAGING DATA TO GRAZ — PASSED

If you have not yet sent the neuroimaging data to Graz, please do so now.

Virtual Investigator Meeting

We are planning a virtual investigator meeting, but it requires preliminary results from the entire cohort. Therefore, it will have to wait until clinical baseline data and control data are available from all sites.

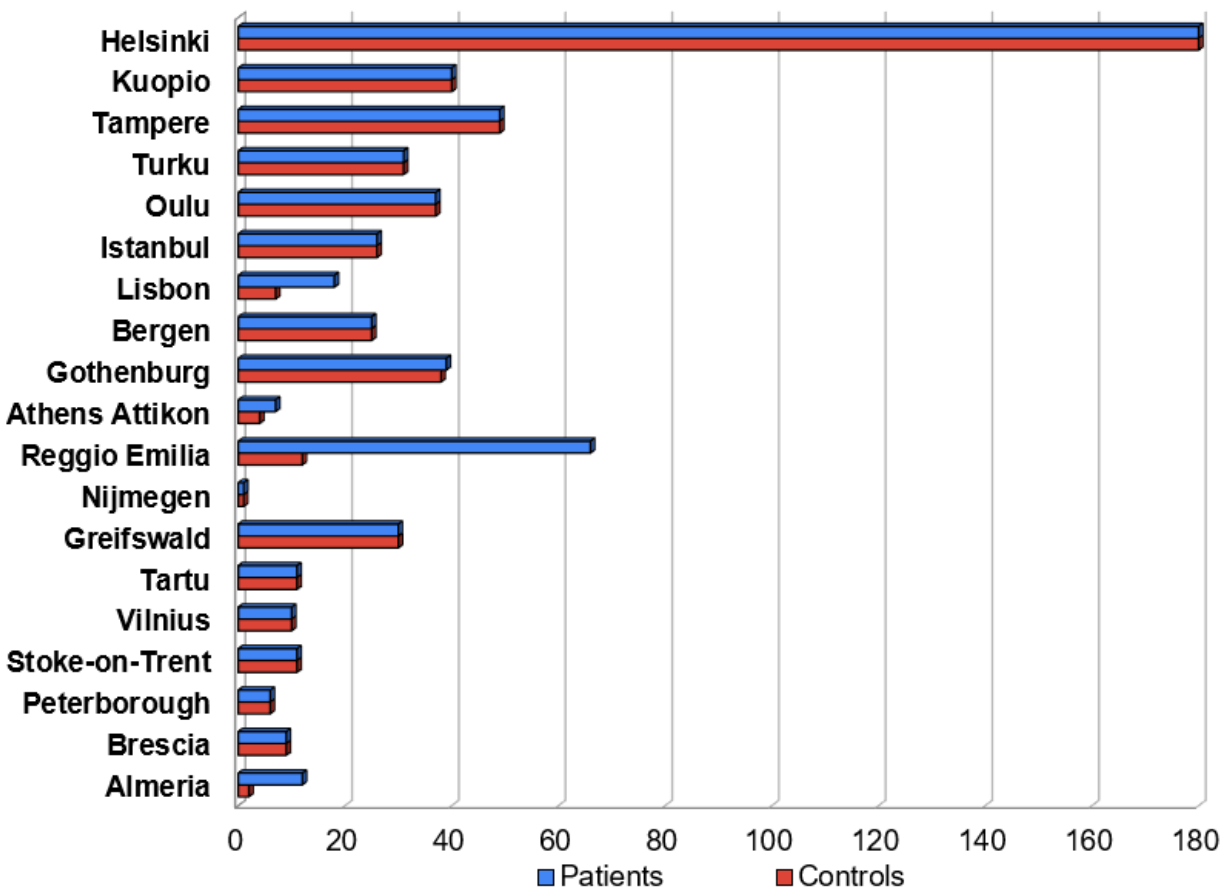

Follow-up, follow-up, follow-up!

The importance of patient follow-up and data cleaning cannot be overemphasized.

Be sure to report all relevant outcomes and submit source documents to central adjudication.

Recap of recruitment, May 2022

Controls : patients ratio by center, May 2022
